# 1. Introduction

This book is an easy guide that will give you an understanding of all the cards in a standard Tarot deck. I have included keywords, a general meaning, reversed meanings, an affirmation and a reflection on each of the 78 cards. This guide will give you enough information to get you started with the Tarot cards, being able to interpret the cards and do simple Tarot spreads.

A Tarot Deck comprises of 78 illustrated cards, 22 Major Arcana and 56 Minor Arcana cards. The word *Arcana* means “secret” and suggests that Tarot cards contain secrets or mysteries that only an experienced Tarot reader can interpret.

The Major Arcana are titled cards numbered 0 -21 (Fool – The World) and these represent significant events and life lessons.

The Minor Arcana consists of four suits which correspond to the four suits in a regular pack of playing cards - Wands, Cups, Swords and Pentacles. The cards are numbered 1 (Ace) to 10, with four additional Court Cards – Pages, Knights, Queens and Kings. The suits of the Minor are also related to the four elements - Fire, Water, Air and Earth, each with their distinctive qualities.

Initially, it is a great idea to take your Tarot deck and become familiar with your cards. Take the time to look at each card individually, study them, meditate on the meaning and make a personal connection with each card.

Take each card, one at a time, and look at the image, the colours, the symbols and the words. What do you see in the card?

How does the image make you feel?

What do the symbols mean to you?

Do you get any words or phrases that come up for you?

Does it bring back any memories or associations for you?

Do you relate to any of the characters in the cards?

Are there any words that the card evokes?

Your connection and association with the cards is just as important as the traditional meaning. Keeping a journal is helpful to record your thoughts and interpretations for each card.

Another helpful practice is to draw a card at the start of each day and see how the meaning of the card played out that day. Can you connect the card's meaning with what you experienced throughout that day? Write down your thoughts because it may not always be noticeable straight away, but a week later, it become quite clear.

Your Tarot deck is very special, and should always be treated with love, respect and care. Wrap them up in silk or beautiful fabric, a gorgeous Tarot Bag or a wooden box. Cleanse your cards regularly with bells, sage, incense or the Full Moon "bath".

# 1. Introduction

To get started reading, give your Tarot deck a thorough shuffle and go for a simple 3-Card spread or a 7-Card Spread. When you feel a bit more confident, you can try a Celtic Cross.

Take time to just observe the spread before reading the cards in each position. What is your overall impression? Do the cards look positive, negative or mixed? How many Major Arcana cards have come up? Which Minor Arcana cards predominate in the spread? Are there any numbers that have consistently come up? *Look for any patterns.*

Major Arcana – Major changes and events, life lesson, important phases

Wands – Passion, movement, enterprise

Cups – Love, happiness, relationships

Swords – Communication, thoughts, beliefs, truth, justice, fairness, ideas

Pentacles – Work, money, career, finances, health

The number on the card or the numerology is also significant. Look at which numbers come up in the spread, as it will give you a clue as to what is going on. For example, the Aces represent new beginnings, or the number five suggests conflict, disagreements and arguments.

Some basic numerology knowledge is essential in Tarot card interpretation. Here are the primary number associations:

Aces – New beginnings, and opportunities

Two – Balance, harmony, and decisions

Three – Growth, expansion, birth, creativity, and fun

Four – Stability, order, structure, and discipline

Five – Conflict, disagreements, difficulties, and chaos

Six – Harmony, peace, and beauty

Seven – Challenges, obstacles, opposition, and struggle

Eight – Power, strength, achievement, and success

Nine – Concluding, nearing an end

Ten – Endings, completion, endings and new beginnings

# 1. Introduction

There are **many** interpretations to each card, so keep an open mind and don't get too hung up on the correct meaning. Tarot cards are NEVER wrong! We may misinterpret them, but the cards don't lie!

A great practice is to take a photo of your spread and look at it later to see how the cards played out. Sometimes we don't see the correct meaning initially, but it becomes crystal clear later.

It is always important to remember that although Tarot can reveal the energies around us, as well as *possible* outcomes, every one of us has free will.

Nothing in the future is set in stone. We need to take responsibility for our own decisions and actions, as we are always able to change our destiny if we wish consciously.

Reading the Tarot cards takes time, so be patient and just practice. I genuinely believe that we never know it all, and no one is a complete Tarot expert. There is always something new to learn or discover in Tarot; it is a life-long journey, so keep practising and learning.

## 8. Reversed Card Meanings

Reversing cards is not essential. Many readers, myself included, do not reverse cards while shuffling. Each of the 78 cards have a positive (upright) meaning, as well as a negative (reversed) meaning. It is a question as to whether the person is feeling the positive energy of the card or not.

For example, the Ten of Cups suggests happy families. So, it is either true or the family are putting up a façade because family members don't get on with each other.

At first, reading reversals can be overwhelming, but it does get easier with time. Here are a few ways to interpret reversed cards:

- *Reverse the meaning of the card.* The Hierophant represents convention, traditions and belonging to a group. The reversed meaning suggests being unconventional.
- *A reversed card can suggest delays and obstacles.* A reversed Three of Wands, for example, indicates delays or blockages with travel plans.
- *Sometimes a reversal can reveal that you need to do some inner work first.* A reversed Eight of Cups may mean that you need to address what is it that is holding you back. What is preventing you from abandoning a situation that you have outgrown?
- *A reversed card meaning often suggests that you may not have learned the lesson from the previous card.* For example, the reversed Three of Wands may indicate that there hasn't been enough future planning, and this prevents you from moving ahead.
- *Sometimes a reversed meaning is more favourable than the upright meaning.* A reversed Eight of Swords would indicate empowerment and setting yourself free from self-imposed imprisonment.

You can use reversed cards if you are seeking a “Yes” or “No” to a question. An upright card would be a “Yes”, while a reversed card is a “No”.

You can generally *get an idea from the other cards in the spread, whether the card is the upright or reversed meaning.*

Finally, you can ask the client: “Is this currently happening in your life or not?” For instance, if the Ace of Cups, Two of Cups or Lovers came up, then either the client is currently in a love relationship, or that is what they desire, but don't have.

## 9. Timing in the Cards

Predicting timing in the cards is always a tricky subject. Clients always want to know; “When will it happen?”, “When will I meet my soul mate?” “How long will it be before I get a job?”

Ultimately, the client has free will and have the power to change their destiny themselves if they wish to do so. Nothing is set in stone, and they must be made aware of this during a reading.

However, if you do want to look at timing in the cards, there are a couple of methods that you can use.

Firstly, you can look at the seasons in the cards and generally the Suits will give you an indication:

**Spring - Cups**

**Summer - Wands**

**Fall - Pentacles**

**Winter –Swords**

You can then look at the Suits themselves and see which suit predominates in the outcome.

**Wands – the fastest, days.**

**Swords – fast, days + weeks.**

**Cups – weeks + months.**

**Pentacles – the slowest, months + years.**

## 9. Timing in the Cards

Next, you can look at the number of the Minor Arcana card in the outcome. Therefore the Eight of Wands will suggest that it happens quickly, in eight days or eight weeks. The Three of Pentacles implies at least three months, up to three years.

If you get a Major Arcana card coming up in the outcome, then the astrological sign or month will give you an indication. For example, the Hierophant is the fifth month, May, and the sign of Taurus (late April to late May).

Always remember that the client has free will, and you need to remind them that they have full control of their destiny. If you tell them that their soul mate will come into their lives in 2 months, they may sit back and do nothing because they believe it will happen.

The client could become more pro-active and seek out their soul mate by doing things differently if you don't give them a time frame. They may try dating websites, meeting people and putting it out there to the Universe. Don't let them "expect" it just to happen because it comes up in the cards!! They need to take some responsibility themselves.

Finally, go with your gut feeling and trust your instincts and what you see in the cards!!
